JESÚS SAUL CASTAÑEDA HERNANDEZ

FRONT-END DEVELOPER

ABOUT ME

Web developer with experience in tools like Angular and Node js.

Learning, teaching and technology are things that I love. I am constantly learning and trying to be better with new challenges both personal and professional. I like to help and instruct others on topics that I master for their development.

EXPERIENCE

FRONT-END DEVELOPER

Métrica Móvil, S.A. de C.V. | 2020 - Present

I develop, update and provide maintenance to the web development environment, both Front-end and Back-end to API's and scheduled tasks, troubleshooting and teamwork under the agile SCRUM methodology.

- Deployment of web applications and API's on servers.
- Handling of scheduled tasks in Javascript.
- Use of the Linux operating system.

PROJECTS

DATAWORLD

Web application that uses external API's to get information and display to the user about the weather, covid, relevant news and make weather predictions. The data presented depends on the user's location so that the user is well informed of his environment before leaving home.

- Tools: Angular, Node Js, Express, MongoDB.
- Languages: HTML, CSS, Typescript, Javascript.
- External API's: Open Weather, Nubentus, Mediastack.

POKE-STORE

Pokemon's store. It has filters by name and type, product description section, shopping cart and user accounts.

- Tools: Vue, Node Js, Express, MongoDB.
- Languages: HTML, CSS, Javascript.
- External API's: PokeApi

CUBIC-MUSIC

Web application to listen to Spotify music, shop online of musical instruments and related items. With users management.

- Tools: Angular, Firebase.
- Languages: HTML, CSS, Typescript.
- External API's: Spotify.

SOCKET-CHAT

Real time chat application with private rooms.

- Tools: Node Js with sockets.
- Languages: HTML, CSS, Javascript.

ROBO-DOC

Robot controlled by cellular application remotely by wifi to visit patients and by video call to make visits.

- Tools: MIT App inventor, Firebase.
- Languages: C++
